

## **PharmaMar's Zepsyre<sup>®</sup> ATLANTIS trial in small-cell lung cancer will be an oral presentation at the IASLC's Targeted Therapies annual meeting**

**Madrid, February 20<sup>th</sup>, 2019** – PharmaMar's (MSE:PHM) clinical trial of Zepsyre<sup>®</sup> (lurbinectedin) in combination with doxorubicin in relapsed small-cell lung cancer patients will be presented at an oral session at the 19<sup>th</sup> annual meeting on Targeted Therapies in Lung Cancer that is organized by the International Association for the Study of Lung Cancer (IASLC), taking place in Santa Monica, California, from the 20<sup>th</sup> to the 23<sup>rd</sup> of February 2019. This specialized meeting is designed to provide information about ongoing clinical trials of the newest and most promising therapies for lung cancer.

The presentation will be on Thursday February 21<sup>st</sup>, at 10:25 Pacific time, by Dr. William J. Petty, Director, Thoracic Oncology Program, Professor of Medicine, Section on Hematology and Oncology, Wake Forest School of Medicine.

Zepsyre<sup>®</sup> (lurbinectedin) is currently awaiting results after final analysis during 2019, from two trials that both completed recruitment in 2018. The multi-center basket trial cohort in relapsed small-cell lung cancer that recruited 105 patients to be treated with Zepsyre<sup>®</sup> monotherapy and it is hoped that results are presented at a future congress on oncology.

In addition, the randomized multi-center ATLANTIS phase III clinical trial that enrolled 613 patients with relapsed small cell lung cancer to be treated with either Zepsyre<sup>®</sup> in combination with doxorubicin versus Topotecan or CAV, is due to report top line results around year end 2019.

### **About PharmaMar**

Headquartered in Madrid, PharmaMar is a biopharmaceutical company, focused on oncology and committed to research and development which takes its inspiration from the sea to discover molecules with antitumor activity. It is a company that seeks innovative products to provide healthcare professionals with new tools to treat cancer. Its commitment to patients and to research has made it one of the world leaders in the discovery of antitumor drugs of marine origin.

PharmaMar has a pipeline of drug candidates and a robust R&D oncology program. It develops and commercializes Yondelis® in Europe and has other clinical-stage programs under development for several ty-pes of solid cancers: lurbinectedin (PM1183), PM184 and PM14. With subsidiaries in Germany, Italy, France, Switzerland, Belgium, Austria and the United States. PharmaMar wholly owns other companies: GENOMICA, a molecular diagnostics company; Sylentis, dedicated to researching therapeutic applications of gene silencing (RNAi); and a chemical enterprise, Zelnova Zeltia.
